

INTEGRATED MANAGEMENT POLICY
CANAL CLIMA S.A.S.

INTEGRATED MANAGEMENT POLICY

Canal Clima S.A.S. is an organization dedicated to providing services in the field of geosciences, encompassing information analysis and technical concepts for forecasting and predicting natural phenomena, technological infrastructure of meteorological stations for monitoring and visualization of hydrometeorological and seismic variables, atmospheric electrical discharge sensors, and other equipment for real-time data capture, supported by an early warning response control center, and the certification and registration of carbon dioxide mitigation projects. As part of its strategic planning and organizational sustainability, the Company establishes the following commitments, applicable to all its collaborators, contractors, visitors, and other interested parties:

• Integration of Processes and the Management System

Canal Clima ensures the resources necessary so that, through integrated management, the required processes are implemented and maintained, guaranteeing correct operation and organizational sustainability as a tool for defining and implementing guidelines and achieving organizational objectives.

• Understanding and Fulfillment of Needs and Expectations

Canal Clima determines, understands, and fulfills the needs and expectations of clients and interested parties through the execution of planned and controlled activities, guaranteeing quality in its projects, ensuring compliance with requirements, and generating trust in the market.

• Compliance with Legal Requirements and Acquired Commitments

Canal Clima ensures compliance with applicable legal requirements and acquired commitments in the conduct of operations relating to economic activity, occupational risk management, and environmental protection.

• Risk and Opportunity Management for Continuous Improvement

Canal Clima considers the identification of risks and opportunities, together with the results of analysis and process performance evaluation, as inputs for the continuous improvement of the management system.

• Providing Safe and Healthy Workplaces

Canal Clima identifies hazards, evaluates, and assesses the risks to which collaborators, contractors, and other interested parties may be exposed in the execution of operations, establishing and implementing elimination, reduction, and/or control measures to provide safe and healthy workplaces, thereby promoting quality of working life and the prevention of occupational diseases, accidents, climate change impacts, and property damage.

• Environmental Protection

Canal Clima determines the environmental aspects and impacts generated by the conduct of operations, establishing and implementing prevention, mitigation, correction, and/or compensation controls ensuring the sustainable use of natural resources, the conservation, preservation, and protection of ecosystems and their biodiversity, while preventing pollution and contributing to climate change mitigation and adaptation.

• Participation and Consultation

Canal Clima establishes the mechanisms to guarantee the participation, consultation, and representation of collaborators in the promotion, monitoring of regulations, and prevention of occupational risks within the Organization.

• Social Responsibility

Canal Clima generates local employment, improves the qualification levels of collaborators, and implements other measures as a social responsibility strategy and commitment to communities for the prevention of social impacts and the improvement of quality of life.

• Promotion of Human Rights

Canal Clima upholds the dignity and worth of every person. It promotes and abides by practices that respect and protect human rights, ensuring that all collaborators and interested parties receive fair treatment and enjoy their rights and freedoms. It rejects any form of discrimination based on age, sex, ancestry, color, gender identity or expression, marital status, medical condition, nationality, disability, affiliation, race, religion, beliefs, family type, or any other characteristic protected by applicable laws and regulations.

• Value Generation

Canal Clima appropriately manages its investments and resources to generate sustained growth and deliver the expected returns considering not only profitability but also environmental, social, and governance impacts, as elements of long-term value creation for shareholders.

INTEGRATED MANAGEMENT OBJECTIVES

• Integration of Processes and the Management System

- ✓ Implement and maintain, in an integrated manner, the processes necessary to ensure correct operation and organizational sustainability.

• Understanding and Fulfillment of Needs and Expectations

- ✓ Control operations through the understanding and fulfillment of the needs and expectations of clients and interested parties.
- ✓ Maintain client confidence and satisfaction with the services and products offered.

• Compliance with Legal Requirements and Acquired Commitments

- ✓ Identify and manage compliance with legal requirements and acquired commitments in the conduct of operations.

• Risk and Opportunity Management for Continuous Improvement

- ✓ Identify and control process risks and opportunities.
- ✓ Continuously improve process performance.

• Providing Safe and Healthy Workplaces

- ✓ Identify hazards, evaluate and assess risks, and establish actions for their elimination and/or control, including those arising from climate change.
- ✓ Protect the safety and health of collaborators and prevent property damage during the execution of activities at all work sites, promoting a safety culture.

• Environmental Protection

- ✓ Identify environmental aspects and control the environmental impacts generated by operations.
- ✓ Use the resources necessary for operations in a rational and efficient manner.
- ✓ Manage the appropriate disposal of waste generated in the organization's own activities.

• Participation and Consultation

- ✓ Promote the participation, consultation, and representation of collaborators in the promotion and monitoring of regulations for the prevention of occupational risks.

• Social Responsibility

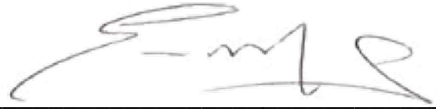

- ✓ Generate employment to support the Organization's operations.
- ✓ Improve the competencies, skills, and knowledge of collaborators in relation to the Organization's operations.

• Promotion of Human Rights

- ✓ Promote practices of respect and protection of human rights established in international treaties, guaranteeing collaborators their rights and freedoms without any distinction.

• Value Generation

- ✓ Appropriately manage investments and resources to generate sustained growth and deliver the expected returns and positive impacts.
